

Meet Housecall Providers and Advanced Illness Care

Housecall Providers is a nonprofit healthcare organization that delivers in-home medical care. For nearly 30 years we have treated those who are homebound or seriously ill, and whose medical condition makes it very hard to access care.

The Advanced Illness Care program

The Advanced Illness Care program helps those who are diagnosed with a serious illness. We offer specialized care to help relieve the symptoms and stress of a serious illness.

If you qualify, we can support you over the phone or in your home. There is no charge for eligible patients.

If you decide to use our service, we'll work closely with you and your other health care providers. We will focus on what is most important to you. We want to help you live as well as possible with your illness to improve the quality of your life.

Our Advanced Illness Care team

The team includes:

- ▶ Nurses
- ▶ Social workers
- ▶ Community health workers
- ▶ Spiritual counselor

Support we offer:

Pain and symptom management

Expert answers about your illness, medicines and treatment options

Counseling and emotional support

Communication with your primary care provider (PCP) and specialists

Care to help you avoid emergency room visits

Other resources to support you and your care

We offer an extra layer of support for you and your caregivers.

The Housecall Providers Advanced Illness Care program will help you live as well as possible with your illness.

Examples of advanced illness:

- ▶ Cancer
- ▶ Heart disease
- ▶ Liver or kidney disease
- ▶ Lung conditions such as COPD
- ▶ Neurological diseases (affecting the nervous system) such as Parkinson's or ALS
- ▶ Immune diseases such as HIV/AIDS
